

# FEP's 2020 Production Workshop – Registration Closed

**Update – June 22nd:**

THANK YOU to everyone who participated in our first Workshops! We are in the process of going through everyone's feedback and determining when and where the next Workshops will be held.

When registration is open again, we will update this page. We can't wait to do this again!

*Our inaugural workshop class*

*Learning how to tie rigging knots*

*Learning how to power up / down a generator*

---

While we all patiently wait out our moment to return to festivals and events, I thought this would be a good time to come together and utilize our collective experiences and resources to **create a set of hands-on (but socially distant) tutorial sessions** for local event professionals.

The result is our first **Production Workshop – running for 2 days on June 8th and 9th at Soundcheck’s Warehouse (1901 E**

51st St, Austin TX 78723).

**UPDATE: The first Workshop is now full;** however, please apply if you're still interested as we will put you on a wait list, and if there is enough demand, will open up a second Workshop, to be held June 15-16 also at Soundcheck Austin.

*Rehearsal Room A – Where the majority of Sessions will take place*

**Here's how it will work:**

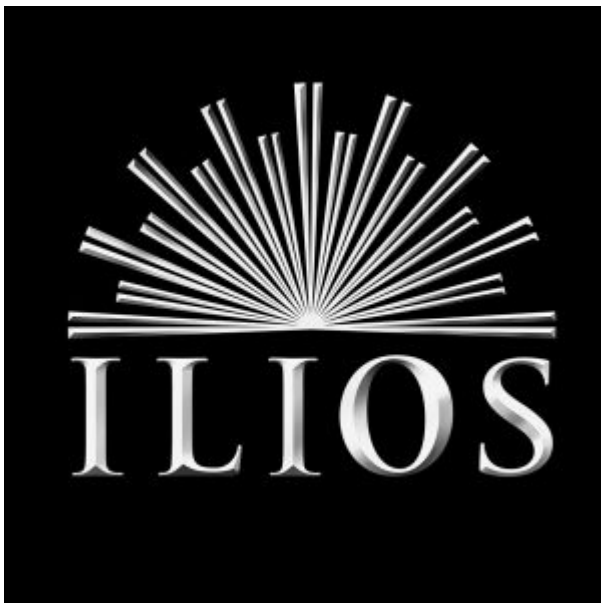

- Registration is just \$30/day, all of which goes to cover the cost of the venue rental (we received a generous discount – thank you, Soundcheck!). There will be opportunities to donate/tip your teachers via online payments if you feel like you really enjoyed your session(s).
- There will be 3 groups of 4 people each. These small groups will help encourage more interaction and hands-on learning.
- We will be following the State of Texas' guidelines for being around each other during these times, which will include the following from all attendees:
  - Capacity of all rooms must remain at 25% or less
  - Everyone must wear a mask
  - Everyone will practice social distancing and keep

- 6 feet apart from each other
- Where applicable, gloves will be provided so you all can touch gear
- Gear will be wiped down / sanitized between sessions
- Be prepared for a temperature check when you arrive each day
- During longer breaks, we will require everyone to leave the main space so we can properly ventilate it
- Bathrooms will be limited to 1 or 2 persons at a time (Soundcheck will make the final call here).
- Extra hand sanitizer will be made available
- **The 2-hour Sessions start at 9am each day – 4 sessions each day in total, so expect your total time at the Workshop to last from approx 9am to 7pm (Monday June 15th and Tuesday, June 16th), and will consist of:**
  - Day 1 – Audio – provided by Miller Pro Audio
  - Day 1 – Lighting – provided by ILIOS Productions
  - Day 1 – *1 Hour Lunch Break Offsite*
  - Day 1- Backline – provided by Soundcheck
  - Day 1 – Video/LED – provided by ILIOS Productions
  - Day 2 – Event and Crowd Safety / COVID Updates – provided by Code4
  - Day 2 – Rigging/Labor – provided by JTP
  - Day 2 – *1 hour Lunch Break Offsite*
  - Day 2 – Power – provided by Event Power
  - Day 2 – Leadership / Full Team Q&A – provided by Mike Hanley and others
- The focus of these sessions are to empower you to understand what it takes for each element (i.e., audio, lighting) to load in, load out, advance, and execute their jobs day of show. You'll see why they need the time and personnel they need to do their jobs properly, and you'll likely be able to save yourself (and your clients) time and money when asking for future quotes because you can better plan for what you both need from

each other.

- Everyone who is selected to attend will also receive a session curriculum with suggested (but not mandatory) reading, a glossary of key terms, and other details.
- Afterward, I request that everyone provides us with feedback so we can look to improve for future workshops.

***And a huge THANK YOU to all of our participating companies:***

The logo for "SOUND CHECK AUSTIN" features the words "SOUND CHECK" in a large, bold, purple-to-white gradient font. Below it, the word "AUSTIN" is written in a smaller, white, sans-serif font.The logo for "Miller Pro AVL" consists of the text "Miller Pro AVL" in a white, italicized, sans-serif font, followed by a white circular graphic element that resembles a stylized 'V' or a partial circle.The logo for "ILIOS" features a stylized sunburst or fan-like graphic above the word "ILIOS" in a white, serif font.The logo for "Event Power" has "Event" in a white, serif font and "Power" in a bold, orange, sans-serif font, with a white lightning bolt graphic integrated into the letter 'P'.The logo for "CODE4" is a stylized, high-contrast graphic where the letters are formed by black and white rectangular blocks.
